Aluminum Autoloading Ambulance Stretcher

FEATURES

- * Constructed from high strength thick aluminum alloy pipes yet light enough for one man operation
- * Two mechanical handles, when pressed folds the legs for loading into the ambulance
- * Comes with a leg lock to prevent accidental folding of the legs.
- * Head rest can be adjusted in 5 position with a simple lever (0 to 75°)
- * Self locking hand rails collapse quickly, when lever is pulled out. Fast and convenient for the operator.
- * Stretcher's loading wheel can be adjusted to 3 positions (68cm, 63cm and 58cm) to suit your ambulance's height
- * Comes with a height adjustable IV Pole which can be stowed & locked into a holder when not in use. IV Pole extends from 52cm to 80cm
- * Waterproof plush foam cushion with pillow and 3 patient restraints are included
- * 4 - Ø125mm silent wheels with dust cover (2 with and 2 without brakes). Stable, durable and absorbs shock
- * Comes with two locks to fix on the ambulance's base. Stretcher automatically locks in place when pushed in.
